

SEHAR IFTIKHAR

Web Developer & Designer

sehariftikhar@gmail.com | 03120186784 | Burewala, Pakistan

PROFESSIONAL SUMMARY

Versatile and innovative Web Developer & Designer specializing in modern frontend engineering (React, Next.js, Tailwind CSS) and full-scale WordPress / Elementor development. Proven track record of leveraging advanced AI models (OpenAI, Gemini, Claude) via Antigravity to accelerate workflows, generate prototypes, and convert AI-generated designs into high-performance, pixel-perfect web applications. Passionate about building responsive, modern, and interactive digital experiences — including 3D & Spline animations — across diverse industries.

TECHNICAL SKILLS

Frontend & Web:

HTML5, CSS3, JavaScript (ES6+),
React.js, Next.js, Tailwind CSS,
Bootstrap

CMS & Builders:

WordPress, Elementor / Elementor
Pro, Gutenberg, Custom Theme &
Layout Customization, Website
Migration

AI Tools & Design:

OpenAI, Gemini, Claude, Antigravity AI,
Spline 3D, CSS Animations, UI/UX
Design, SaaS & Landing Page Layouts

WORK EXPERIENCE

Web Development Intern

May 2026 – Sep 2026

Hywiz Technology — Burewala, Pakistan

Practical Experience & Project Highlights

Engineered and deployed 15+ modern websites using a hybrid workflow of AI tools (OpenAI, Gemini, Claude via Antigravity) and custom coding, dramatically speeding up turnaround times.

Converted AI-assisted mockups, HTML/CSS code, and Figma concepts into functional, responsive WordPress websites using Elementor and custom builders.

Developed fast, responsive UIs and web applications using HTML5, CSS3, JavaScript, React, and Tailwind CSS with clean, modular code architecture.

Designed and integrated interactive elements, micro-animations, and Spline 3D models for modern SaaS, tech startup, and AI agency landing pages.

Ensured pixel-perfect responsiveness, cross-browser compatibility, SEO-friendly markup, and optimized page speed across all client-facing properties.

AI to WordPress & Modern Web Pipeline: Built end-to-end multi-page websites by drafting architectures with OpenAI, coding custom components, and transitioning them into flexible, client-editable WordPress / Elementor themes.

Full-Stack & Modern Web Projects: Delivered responsive frontend applications and dashboards utilizing React, Next.js, and Tailwind CSS.

High-Impact Interactive Experiences: Created 15+ specialized web projects including SaaS portals, AI automation agencies, and 3D interactive web experiences featuring Spline and modern animations.

EDUCATION

BS Information Technology

2022 – 2026

University of Agriculture, Burewala Campus
